ALTERGY INCREASES PRODUCTION CAPACITY Company Experiencing Growing Global Demand For Fuel-Cell Systems

FOLSOM, CA, November 4, 2010 –[Altery Systems](#) today announced that it has expanded the capacity of its automated fuel-cell assembly line - the first and only one in the world - to support its increasing global customer demand and continuing growth into new international markets.

These assembly-line enhancements increase Altery's production capacity to approximately \$370 million annually in fuel-cell systems.

Altery is the world's first company to design fuel cells that can be mass produced at low cost. The company's emission-free systems are becoming the clean-energy solution standard for telecommunications back-up power and other mission-critical applications.

"These enhancements to our production process will enable us to more easily serve customer needs and meet growing demand for our products," said Eric Mettler, Altery president and chief executive officer. "They also demonstrate our leadership position in the industry and will help us achieve our mission of Changing the Way the World Gets Its Power."

In August, Altery also announced a partnership with the Republic of South Africa to build an additional Altery manufacturing and assembly plant there to serve South Africa and other Sub-Saharan African markets.

Caution Concerning Forward-Looking Statements

This press release (and oral statements made regarding the subjects of this release) contains forward-looking statements (within the meaning of the Private Securities Litigation Reform Act of 1995, or the Reform Act) which may include, but are not limited to, statements regarding Alteryx's earnings estimates, plans, objectives, expectations and intentions and other statements contained in this press release that are not historical facts, including statements identified by words such as "believe," "plan," "seek," "expect," "intend," "estimate," "anticipate," "will," and similar expressions. All statements addressing operating performance, events, or developments that Alteryx expects or anticipates will occur in the future are based on management's current views and assumptions regarding future events and operating performance, and are inherently subject to significant business, economic, and competitive uncertainties and contingencies and changes in circumstances, many of which are beyond Alteryx's control. The statements in this press release are made as of the date of this press release, even if subsequently made available by Alteryx on its website or otherwise. Alteryx does not undertake any obligation to update or revise these statements to reflect events or circumstances occurring after the date of this press release. Although Alteryx does not make forward-looking statements unless it believes it has a reasonable basis for doing so, Alteryx cannot guarantee their accuracy. The foregoing factors, among others, could cause actual results to differ materially from those described in these forward-looking statements.
